

Access Guide

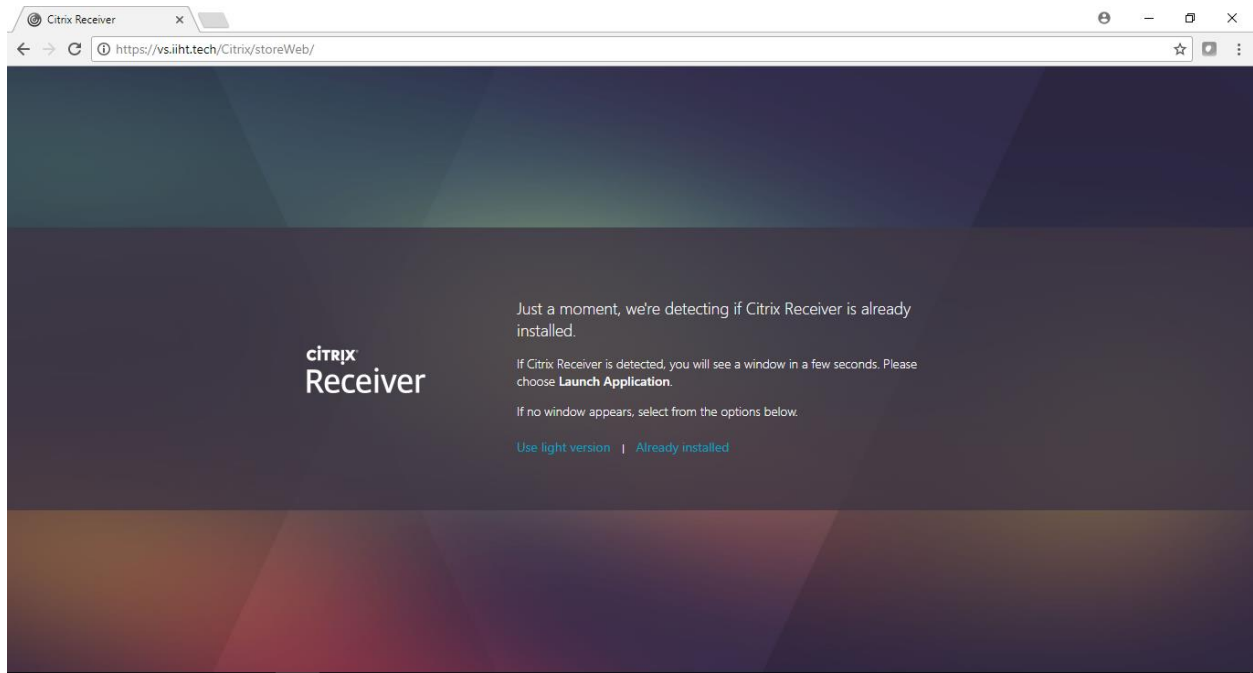

Open <https://vs.iiht.tech> in any of the browser

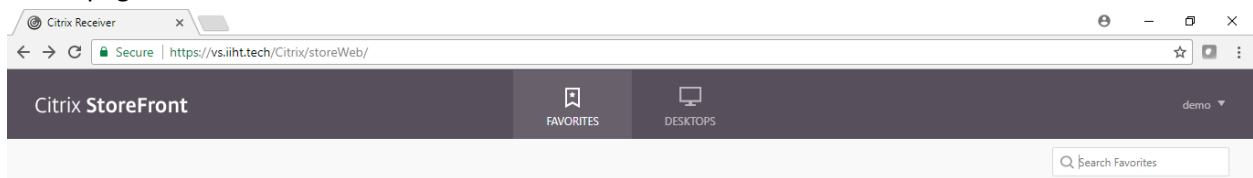

Provide your credentials to login and it will take you to the page asking for how you want to access labs.

If you have receiver installed click on Detect Receiver and select already installed.

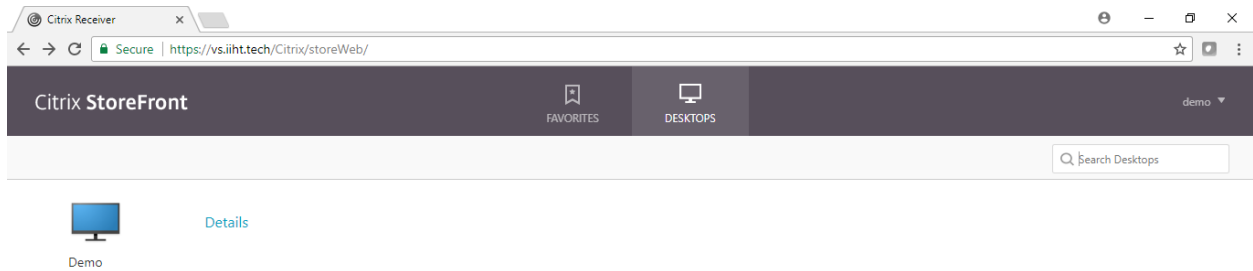

If you don't have Citrix receiver installed click on Use light version. In both the cases you will land on the below page.

Add Favorites

Go to Desktops, click on Details next to your choice and then select Add to Favorites.

Click on Desktops and you will see the VDI assigned.

After logging in wait for a minute and then click on the VDI icon. If you don't wait you will get an error "Unable to connect". This happens because the machine turns only once you login and boot time is required.
